EDUCATION

Aditya College Of Engineering (JNTUK)

Bachelor Of Technology (Computer Science And Engineering)

2019 - 2023

Kakinada, AP

EXPERIENCE

ADP | Golang, AI Engineer

Software Engineer

July 2023 – Current

Hyderabad, India

- Working on building **AI Agents**, tools using **MCPs & RAG Systems** around Lyric™ platform.
- Worked on both API and File-Based Integrations, which involves developing/maintaining microservices in **Golang** for Lyric™ systems.
- Integrated **Microsoft Entra** to **ADP's Lyric** to support various features for clients like **Active Directory**, **Manage Identities**, **SSO** etc.
- Ideated and developed new **strategies/architectures** for our services, which helped in **latency** and **throughput**.

Hitachi Vantara | Digital Insights

Data Engineer Intern

Feb 2023 – July 2023

Hyderabad, India

- Trained as a **Data Engineer** and got exposed to various technologies related to **storing and analyzing** data at scale.
- Worked on various analytical tools like **PowerBI**, **Tableau**, and also worked on **Snowflake** Databases.

ADP | Java, Spring Framework

Java Developer Intern

July 2022 – Dec 2022

Hyderabad, India

- Worked on a project feature to **parse documents** which contains functional specifications from the clients, written in **Java**.
- Wrote business logic for the **APIs** which supports **Document parsing**, **de-serialization** of data for the Virtual Assistant and raised **4 pull requests** to production
- The API includes reading the **functional specifications** from the documents and serialize into database format and store them.

PROJECTS

GraPer | Golang, TUI

Dec 2023, [🔗 Link](#)

- GraPer is a **Terminal User Interface (TUI)** web scraping tool written in **Golang** to detect **dead-links** in a website(4xx or 5xx).
- The tool uses **concurrency** to crawl through out the website having same domain which is passed as a parameter and check for dead-links.
- Supports various flags and displays the final output in an TUI to interact with.

A* Path Finding Algorithm Visualizer | Python, Pygame

Mar 2022 [🔗 Link](#)

- Visualizer uses **A* path Finding Algorithm** to find the **Shortest Path** between nodes in a 2D Grid live.
- Algorithm Works based on **Heuristics** like **Manhattan Distance** to stop the Floodfill.

Gotiny | Golang, Go Template, Postgres, Redis

Dec 2023, [🔗 Link](#)

- Gotiny is a **URL Shortener** tool written in **Golang** and also supports **URL analytics**. The Frontend is served using **Go Templates**.
- The tool uses **concurrency** to serve clients and uses **PostgresDB** as a persistence and **Redis** as a cache.
- Uses **Go Template** for **server side** rendering of front end.

TECHNICAL SKILLS

Languages: Golang, C++, Java, Python

Frameworks & Game Development: React, LangGraph, Spring, Unreal Engine, Graphics Programming(OpenGL)

AI Skills: Agents, MCPs, Context Management, RAG, Prompt Engineering, Workflows

Competitive Programming: [🔗](#) Leetcode: **1000+** problems solved, [🔗](#) GeeksForGeeks: **350+** problems solved
